# ABOUT KAY2 PAPER BOX

## **Local Manufacturing**

At Kay2 Paper Box our mantra is **"Bring it back to the Northwest."**

Why order product and ship it across the United States when our manufacturing is right here in Beaverton, Oregon? We have loaded this catalog with our list of core products. There are many other miscellaneous items in stock. If you don't see something you need, give us a call at 503.644.9510.

## **Experience**

Our staff has been in the packaging, printing and fulfillment industry for 25+ years. Heck, if you have product you would like co-packed you have come to the right place. Do not hesitate to call if you would like for us to quote custom folding cartons as well.

## **Product Line**

Our comprehensive line of non-printed boxes (Stock Boxes) include bakery, deli, candy, gift, apparel, letterhead, business card, kraft mailers, specialty boxes and more.

We look forward to your business! We are just a phone call away.

# IMPORTANT INFORMATION

## To Place an Order

- Call 503.644.9510 or Toll Free 877.875.2269 (877.87K.2BOX)
- Fax order to 503.644.9507
- E-mail order to customerservice@kay2paperbox.com

## Minimum Order

- One case of any stock item.
- 2,500 pieces or more of any custom items.

## Lead Times

All orders must be placed one day in advance of delivery, shipping, or will call date.

- Stock items normally ship within 24 hours of receipt of order.
- Production items will normally ship within 2 weeks of receipt of order.
- Custom items will normally ship within 4–5 weeks of the date the order is approved.

## Handling & Shipping

- Orders under \$100 will be assessed a \$10 small order handling charge.
- UPS shipments on COD basis will specify CASH ONLY on delivery.
- All orders will ship FedEx unless otherwise noted on purchase order.

## Freight Charges

- All boxes are F.O.B. factory, Beaverton, OR
- Orders over \$1,500 are prepaid to customers in Oregon and Washington.
- Orders over \$2,000 are prepaid to customers in Idaho.
- All other shipping charges will be invoiced.

## Returns / Credits

- All merchandise returns or allowances must be requested within 30 days of delivery.
- Returns are subject to a minimum 25% restocking charge.
- Requests for return or credit require the following action:
  1. Call KAY2 to request a Return Merchandise Authorization number (RMA).
  2. Report general condition or problem with shipment or item.
  3. Disposition of material in question will be determined (i.e. return to KAY2, destroy, keep at discount, etc.).

## Terms

- 2% 10 days net 30 from invoice date on approved credit.
- A service charge for past due accounts will be 2% per month (24% per annum). Collection expenses and/or attorney's fees will be added if a collection agency or attorney is employed for collection on past due accounts.

## Other

- All prices are subject to change without notice.
- Items may be discontinued without notice.

## Custom Boxes

- Contact our office for information regarding custom folding carton manufacturing, plain or printed.

# BOARD & BOX INFORMATION

## Paper Board

The flexible mat of bonded fibers used in the manufacture of folding cartons is called "paperboard." Paperboard is a substrate composed of wood and other materials, which has been milled and converted into various grades and calipers. Clay coatings may be applied to paperboard to create a high-quality, smooth printing surface.

## SBS Paperboard (Solid Bleached Sulfate)

SBS paperboard is bleached, which gives the sheet a clean, white appearance all the way through. The bleaching process degrades and weakens the "virgin" fibers, which in turn, has some effect on the strength of the sheet. The clay coating on the SBS sheet provides a smoother printer surface than SUS or recycled fibers, because bleached fibers are smooth, clean and pliable. SBS paperboard is usually one ply.

## Embossed SBS (Solid Bleached Sulfate)

Passed thru an alligator skin embossing tool at time of sheeting.

## SUS (Solid Unbleached Sulfate)

Also known as CNK (Clay Natural Kraft) – SUS paperboard is not bleached, which gives the sheet a draft/brown appearance all the way through the sheet. The sheet may be clay coated or uncoated. SUS is composed of "virgin" fiber, making it the strongest of the paperboards, but not the smoothest printing surface. SUS paperboard is two or three ply and can be treated with a moisture barrier to render it useful for beverage carriers.

## Uncoated Paperboard

Uncoated recycled paperboard, a multi-ply material, is produced from 100% recovered paper – collected from paper manufacturing and converting plants and post consumer sources – and represents the single largest market for recovered paper in the United States. Some uncoated paperboard is produced with a top ply of white recovered fiber or vat dyed for color.

## Recycled Paperboard

CCNB (Clay Coat News Back) – brown or gray (depending on fiber used), clay coated one side.  
CCLB or CCGB (Clay Coat Light Back or Gray Back) – light gray, clay coated one side.  
CCKB (Clay Coat Kraft Back) – brown, clay coated one side.  
KLC (Kraft Lined Chipboard) – brown, uncoated, extra strength kraft lined board.  
BC (Bending Chip) – brown, uncoated.

## BOX STYLE DEFINITIONS

---

**Lock Corner** – A non-glued tray used most frequently as a bakery and garment carton. There are many styles of Lock Corner Trays; for instance, Klicklok.

**RET** (Roll End Tray) – Also known as a Walker Lock Tray. Double End Walls with Foot Locks, Double Turnover End, or Trunk Style. This is a non-glued carton and can also have an attached lid.

**RTE** (Reverse Tuck End) – An economical choice, sometimes referred to as RNT (Reverse Notch Tucked), RTE nests better than STE (Straight Tuck End). It also lends itself to automatic carton machines such as Jones and Bivans, with slight modifications. Tucks may have either friction fit or shore locks for a more secure closure. Tucks can be on panel two (French Tuck) or panel four (Standard Tuck), depending on presentation preference.

**Simplex** – Also called a fitforme or Kwikset Tray. The carton can be used as a single tray or as a two-piece carton (Telescoping Box). The Kwikset Tray has glued rollover sidewalls, which make it the most aesthetically pleasing and durable of all the trays.

**Sleeve** – Used as a decorative cover on corrugated cartons, foam trays, rigid products and folding cartons. With modifications, it is also used for food and beverage containers (cans, bottles, etc.).

**Snap Lock Bottom** – Also referred to as a Houghland Bottom or a 1-2-3 Bottom. This carton is a more secure carton than the STE and RTE. Requires a little more labor than auto. Tucks may have either friction fit or shore locks for a more secure closure. Tucks can be on panel two (French Tuck) or panel four (Standard Tuck), depending on presentation preference. Tabs may also be added to bottom flap on panels one, two, and three, to increase the strength of the bottom.

**STE** (Straight Tuck End) – Sometimes referred to as Airplane Style, or SNT (Straight Notched Tuck). Although not as economical as the RTE, aesthetically this style works better. Tucks may have either friction fit or shore locks for a more secure closure. Tucks can be on panel two (French Tuck) or panel four (Standard Tuck), depending on presentation preference.

**SE** (Seal End) – Usually used for high production runs on automatic cartoning machines. There are various profiles, depending on the specifications for individual cartoning machines as well as maximum layout efficiency. Consult the cartoning machine manufacturer for more information.

**TTAB** (Tuck Top Auto Bottom) – Also called Crash Lock or Inturn Auto Bottom. This profile is used to reduce assembly labor. The Tuck Top has a glued bottom and is much more secure than Tuck Bottoms and Houghland Bottoms. Tucks may have either friction fit or shore locks for a more secure closure. Tucks can be on panel two (French Tuck) or panel four (Standard Tuck), depending on presentation preference. Gluing costs are higher and the profile does not nest as well as RTE and STE.

**TTFFAB** (Tuck Top Full Flap Auto Bottom) – Also referred to as a Full Flap Crash Lock Bottom, this style is used when there are concerns about the weight of a product. This bottom is stronger than a standard Auto Bottom. Tucks may have either friction fit or shore locks for a more secure closure. Tucks can be on panel two (French Tuck) or panel four (Standard Tuck), depending on presentation preference.
